EDUCATION

United Institute of Technology Bachelor of Technology in Computer Science and Technology	2024 – 2028 (Expected) Prayagraj, India
--	--

EXPERIENCE & TRAINING

Generative AI for Gen Z — Industrial Training Intel and HPE	Jan 2026 Prayagraj, India
– Completed comprehensive industrial training on Generative AI applications, modern AI paradigms, and foundational LLM-based models for real-world deployment scenarios.	
Java Collection Framework Certification United Institute of Technology	2025 Prayagraj, India
– Completed a 60-hour advanced Java program; built a data analysis tool for real-world air quality datasets with AQI calculation logic and statistical pre-processing to categorize pollution severity.	

PROJECTS

Chat with PDF — RAG Application Python, LangChain, Google Gemini AI, FAISS, Streamlit	2026 github.com/Unorthodox60/chat-with-pdf
– Built a Streamlit-based Retrieval-Augmented Generation (RAG) app enabling interactive Q&A over uploaded PDFs using Google Gemini AI and FAISS vector similarity search.	
– Engineered an end-to-end pipeline: PDF text extraction → chunk segmentation → Google Generative AI embeddings → conversational QA with LangChain.	
DeepLabV3+ Road Scene Segmentation TensorFlow, ResNet101, ASPP, Streamlit, Hugging Face	2026
– Engineered a DeepLabV3+ semantic segmentation model with a ResNet101 backbone and ASPP module to classify road scene pixels for autonomous driving applications.	
– Processed custom datasets via Hugging Face pipelines and deployed a Streamlit web app, achieving 93.14% accuracy over 30 epochs.	
Customer Churn Prediction & Survival Analysis Python, Flask, Random Forest, SHAP, Kaplan-Meier, Cox Hazard	2026
– Deployed a Flask web app with a hyperparameter-tuned Random Forest model (ROC-AUC: 0.85); integrated Kaplan-Meier and Cox Hazard survival analysis for churn risk forecasting.	
– Applied SHAP values for game-theoretic feature interpretability, providing transparent model explanations to end users.	
Sentiment Analysis on Tweets Python, TensorFlow/Keras, GloVe, XGBoost, NLTK, SVM	2026
– Designed an NLP binary classification pipeline using NLTK, GloVe embeddings, and a 4-layer CNN; developed an ensemble majority-voting system for maximized validation accuracy.	
Botanical Traceability & Supply Chain System Blockchain — Smart India Hackathon (SIH)	Sep 2025
– Spearheaded a team to architect a blockchain-based transparency system for tracking Ayurvedic herbs and preventing supply chain tampering.	

ACHIEVEMENTS

SIH Qualifier	Qualified the Inter-College round in the Smart India Hackathon (SIH) as Team Head .	2025
Certification	Java Collection Framework — 60-hour advanced program.	2025
Events	Active participant in technical summits including Google DevFest and TEDx UIT.	2025
Open Source	Successfully uploaded first code patch to the MediaWiki Gerrit server as part of Wi-kiClub Tech.	2026

TECHNICAL SKILLS

Programming: Java, C, C++, Python, JavaScript	Web & Frameworks: HTML, CSS, React.js, Flask, Streamlit
ML/AI: TensorFlow, Keras, Scikit-learn, XGBoost, LangChain	NLP & Retrieval: NLTK, GloVe, FAISS, RAG, LLMs
Data: Pandas, NumPy, Matplotlib, SHAP, Seaborn	Dev Tools: Git, VS Code, PyCharm, Jupyter Notebook

RELEVANT COURSEWORK

Core CS: Data Structures & Algorithms, Object-Oriented Programming, Machine Learning Foundations, Web Development
--

POSITIONS OF RESPONSIBILITY

Team Head, Smart India Hackathon: Inter-College Level	2025
Volunteer, GDG on Campus UIT: Google Developer Groups, United Institute of Technology	2026 – Present
